

Empire/EMCO presents

The New Flip Tip™

No More Lost Tips!

- * The "Flip Tip™" resealable closure eliminates the risk of separation of the closure tip from the cap body.
- * The "Flip Tip™" can be opened, locked into place for product dispersion, then closed *using only one hand*.
- * The elongated spout, in your choice of colors and dispensing patterns, lends itself to any product where precise application is desirable.
- * The patented design enhances consumer safety and confidence when using products where the integrity or freshness can be compromised by air exposure which often leads to product hardening, chemical reaction or spoilage.
- * Designed to help streamline the filling, handling and packaging during the production process, the new "Flip Tip™" is a versatile and practical solution for products that are used and re-used.
- * Made in the USA

Great For:

Food Products

Pharmaceuticals

Pet Supplies

Industrial

Automotive

Household

Lubricants

Adhesives

Crafting Supplies

Paints

...and more
